

# How is the monthly lease calculated?

# Leasing. Simple. For all.

At ASG Leasing, we are committed to our mission, to make leasing simple, for all. This is why we have created a series of documents to shine a light on all the premises of operational leasing!

These documents were created after a thorough market research and have as an objective to make you understand what leasing is and how it works.

Once you grasp that - everything else is simple!

# So, how is the monthly lease calculated ?

## Value of the vehicle leased

As all of our leasing vehicles are brand new, one of the most important factors on establishing the monthly lease rate is the value of the vehicle. The more expensive the vehicle is, the higher the rate will be.

Fortunately we are living in an age of many quality options. With the network and guidance of ASG Leasing, you will be able to minimise cost and maximise efficiency on your leasing contract!

## Insurance

All of our leasing contracts come with an insurance that covers all third parties as well as the damage done to the vehicle over and above the agreed "excess" amount.

The "excess" amount will be paid by the party leasing the vehicle before ASG Leasing covers any other vehicle costs. The "excess" amount can be minimised with a small surcharge on the monthly lease.

## Mileage Use

With ASG Leasing you get 25,000 KMs of use per year in your initial package. This is usually more than enough to cover the yearly mobility needs of our clients. In case more mileage is needed, then our clients are able to pre-purchase it on a discounted price, or pay it at the end of each year on a slightly higher price.

When pre-purchasing the mileage, there is the flexibility of paying nothing extra if you do not make use of the specific threshold.

## Maintenance and Service

The operational expenses of the vehicle are taken care of by ASG Leasing. Whether it is service, tyre change, oil change or a break-down, we will take care of picking up the vehicle, fixing it and delivering it back to you. During that down-time we will provide you with a similar vehicle in order to minimise any disruptions to your business operation flow.

The only expense you will worry about is gas.
